TEXA'S KONFORT A/C RANGE RECEIVES THE "BESTE MARKE 2018" AWARD

The readers of the German professional magazine **PROFI Werkstatt** voted the **KONFORT** solutions as the best for servicing vehicle A/C systems.

Another remarkable achievement for TEXA in Germany. In the official opening day of the **Automechanika Frankfurt** trade fair, TEXA received the "**Beste Marke 2018**" award in the **A/C Charging Stations** category.

The readers of the professional magazine **PROFI Werkstatt**, dedicated to the after-market world, expressed their preference for **KONFORT 700**, the sophisticated range of stations for servicing and recharging air conditioning systems in vehicles. TEXA received almost 20% of the total votes by the magazine readers, who could express their vote (also on-line) for their favourite company and product in 22 different categories.

"This new achievement is particularly important for us – explained **Bruno Vianello**, **TEXA's President** – because we receive it 'not on home ground', significantly surpassing historic and established German manufacturers of A/C charging stations. The **KONFORT** charging stations are one of our flagship products, trusted by repair professionals since their birth. This prize is a reward for the commitment and investments constantly made by our company".

With its **ten different models** dedicated to refrigerants **R134a**, **R1234yf** and **R744**, the **KONFORT 700** range is recommended by important vehicle manufacturers and protected by several patents. Over the years, it has been able to stand out in the global market for its manufacturing quality and reliability. All **KONFORT** stations are **manufactured in Italy**, on completely automated production lines that comply with the strictest international certifications.
