INFORMATION AND BENEFITS

TEXA believes in giving customers flexibility—our IDC6 software can run on any third-party laptop or tablet that meets minimum requirements.

However, for the best performance, reliability, and overall user experience, our proprietary AXONE tablets are purpose-built to get the most out of TEXA diagnostic software.

That's why we're currently offering a special promotion for customers using non-TEXA devices—making it easier than ever to upgrade to a faster, more durable, and fully integrated solution.

AXONE NEMO VOICE

How does it work?

Upgrade to an AXONE tablet and we will transfer your existing TEXA software from your current laptop completely for free. On top of that, you'll receive 12 months of TEXPACK software updates at no cost for all your IDC5 or IDC6 licenses.

What if I have multiple licenses?

The more licenses you have, the more you gain! If you have both TEXA TRUCK and OHW software and you purchase an AXONE PLUS tablet (\$3,000 MSRP), you'll receive free TEXPACK subscriptions (\$995 each) for both. Upgrade to a high-end tablet, improve your trusted scan tool and get \$1,990 in free software updates!

What other advantages do I get?

- Your current VCI (TXTs, Multihub or Multihub 2) and cables stay with you minimizing your investment.
- The tablet warranty (extendable after year one) also covers your VCI, regardless of model or age.
- No more green USB key! The TEXA tablets eliminate the need for the external security key.
- Easier troubleshooting and support from TEXA since hardware and software are fully aligned.
